Peter shares some memories about **the good old days***

* "The good old days" is an expression you use when you remember a period fondly.

Instructions: Read the text aloud.

Sally: Hey Peter, can I ask you something?

Peter: Sure. What is it?

Sally: I'm going to write a feature on friendship for the magazine. I was thinking of interviewing some of my friends about the relationships they've had over the years. I think I'll start with you!

Peter: That's a cool subject. I'd love to share some personal stories.

Sally: Perfect. Let's start then. Did you have many friends as a kid?

Peter: I guess I did. I grew up here, so my dad would take me and my buddies to watch the Red Sox every week in the summer. In the winter, we would play hockey or go ice skating. I used to love it.

Sally: You don't like it anymore?

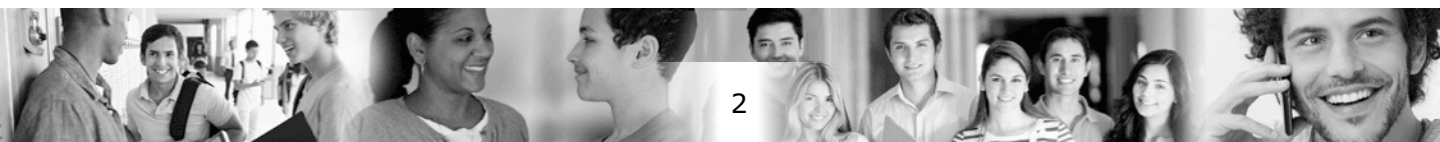

Peter: I still do, but I just don't have the time to get on the rink now.

Sally: I know what you mean ... Next question: Did you get along with your friends?

Peter: Yeah, I guess. We used to organize our own sports competitions. We would give prizes to everyone.

Sally: What kind of prizes were they?

Peter: Freezies and pops! The taste of summer!

Learning Points

Talking About Future Actions

You can use two different tenses to talk about the future.

- When you talk about things that are not decided or when you make a decision at the moment of speaking for the future, you use the modal *will*.
- When you ask about intentions, you use *going to*.

Structure	Example
Will	<i>I'll start with you.</i> <i>Will you start with me?</i> <i>We won't be starting with you.</i>
Going to	<i>I'm going to write a feature on friendship for the magazine.</i> <i>Are you going to write a feature for the magazine?</i> <i>I'm not going to write a feature for it.</i>

Used to and Would

Would and **used to** have rather similar meanings. They are both used to describe something that happened regularly in the past but doesn't happen any longer.

However, there is an important difference between **used to** and **would**.

Would is not used unless you know that the time frame is in the past, while **used to** does not require this.

Read the following example:

We used to visit India. (correct)

However, when **would** replaces **used**, the same example becomes ungrammatical:

We would visit India. (not correct)

We would visit India every summer when we were children. (correct)

Examples:

- *We used to organize our own sports competitions.*
- *We would give prizes to everyone.*
